PROFILE

Execution-oriented operations professional specializing in process architecture, cross-functional team coordination, and workflow optimization across hospitality, manufacturing, and logistics sectors. Proven capability to build scalable standard operating procedures (SOPs), manage complex vendor networks, and implement structured operational reporting that drives execution. Adept at translating high-level business requirements into repeatable daily operations, improving inventory visibility, and seamlessly adapting systems to support steady-state and peak season demands.

CORE COMPETENCIES

Operations Management

Cross-Functional Team Coordination
SOP Development & Audit
Vendor & Supplier Management
Continuous Process Improvement

Planning & Control

Capacity Planning & Scheduling
Inventory Management & Control
Operational Metric Reporting
Procurement & Resource Allocation

Systems & Tools

Odoo ERP
HubSpot CRM & Sandbox
Notion & Project Frameworks
MS Excel & Google Sheets

EXPERIENCE

Operations Manager - Bali Villa Management

Bali, Indonesia

Scope & Team Coordination: Directed daily operations across a 13-villa portfolio, managing a cross-functional team of 14 personnel including Housekeeping, Maintenance, Pool/Garden, Administration, Customer Service, and Supervisor Supervisors.

Operational Execution: Managed complex staff scheduling, property turnover coordination, guest issue resolution, and routine maintenance logistics to ensure uninterrupted property operations.

Vendor & Financial Management: Coordinated external suppliers, managed vendor contracts, and executed monthly billing and procurement processes.

Process Improvement: Restructured internal workflows and improved the execution of property Standard Operating Procedures (SOPs).

Reporting & Systems: Established a standardized daily operational reporting system through supervisors, significantly improving visibility into daily metrics and staff accountability. Utilized Airbnb, Booking.com, Channel Managers, and structured communication tools.

Operations Supervisor • Kue Kacang Arini

Bandar Lampung, Indonesia

Scope & Execution: Managed end-to-end production operations, encompassing quality control, packaging, procurement, inventory management, and outbound distribution.

Team Coordination: Directed a core team of 3 daily production staff, dynamically scaling and managing up to 10 personnel during peak seasonal operations to support business scaling.

Process Improvement: Redesigned the facility's production layout and improved daily scheduling, optimizing throughput to meet volatile seasonal demand.

Inventory & Distribution: Overhauled the inventory control system to prevent stockouts and streamlined distribution coordination for reseller fulfillment.

Digital Presence: Initiated and optimized the Google Business Profile, standardizing the brand's professional digital footprint for local discovery.

Operations Supervisor • Lampung Exotic Pets

Bandar Lampung, Indonesia

Scope & Logistics: Coordinated daily operations for a 5-person team, specializing in live inventory management, logistics coordination, and domestic shipment preparation.

Process Improvement: Architected and introduced strict quarantine procedures for new arrivals prior to general inventory integration, mitigating health risks.

Execution & Compliance: Improved the intake process and routine animal health monitoring protocols. Assisted in the coordination of necessary shipping documentation and compliance requirements.

EXPERIENCE

OPERATIONAL PROJECTS

ERP & Workflow IntegrationOdoo & Monday.com

Workflow Mapping: Architected and mapped end-to-end operational workflows for seamless team handoffs.

Process Design: Structured B2B CRM processes and operational reporting frameworks in a Odoo database to enhance data visibility.

Inventory Architecture: Designed and tested inventory management structures for scalability.

Automotive Operations Blueprint

SOP Framework Design: Developed comprehensive procedural frameworks for daily service execution at a detailing studio.

Workflow Architecture: Mapped service workflows to eliminate bottlenecks between intake, service, and delivery.

Process Mapping: Created a repeatable operational blueprint to standardize service quality.

Aquaculture Operations Architecture

Facility Planning: Coordinated the spatial and operational planning for scalable intensive pond production facilities.

Process Architecture: Developed the foundational operational blueprint outlining daily maintenance, feeding schedules, and environmental control procedures for an intensive production MVP.
